I am writing today to express my strong support for XM Satellite Radio and specifically their Instant Traffic & Weather service. I find the instant traffic and weather to be a valuable service that is not offered through any other broadcast means. The quality and high availability of this service makes it stand out from any other option.

Additionally, since this is a service that I subscribe to, I strongly discourage any legislation that would in any way eliminate or tamper with the service as it stands today.

I urge you to reject the NAB's petition 04-160, and continue to support XM radio's ability to provide a superior service to the free market.

Sincerely,

Rhese Hoylman IV
